Run your business securely in the AI era

Adopt AI-ready productivity and security for every employee with Microsoft 365 Business Premium

Microsoft 365

Growth, innovation, and new risks are arriving together

AI is transforming how businesses operate. Adoption is accelerating, with 68% of businesses already using generative AI.[1] Additionally, AI agent usage is expected to scale rapidly in the coming years. As organizations scale, complexity increases and fragmented tools can expand security exposure.

Attackers have also adapted to use AI to move faster. Traditional security approaches struggle to keep pace with AI-engineered phishing, ransomware, and business email compromise attacks. Growing businesses need a simpler way to improve productivity and strengthen security without adding complexity.

Microsoft 365 Business Premium gives you a unified platform for AI-powered productivity

Microsoft 365 Business Premium provides the foundation that growing businesses need for AI-ready productivity and security. Employees get access to Microsoft Copilot embedded into the productivity tools they already use, helping them draft communications, summarize information, analyze data, and collaborate more efficiently. Enhanced collaboration capabilities and a connected Microsoft 365 experience empower teams to get more done while reducing complexity.

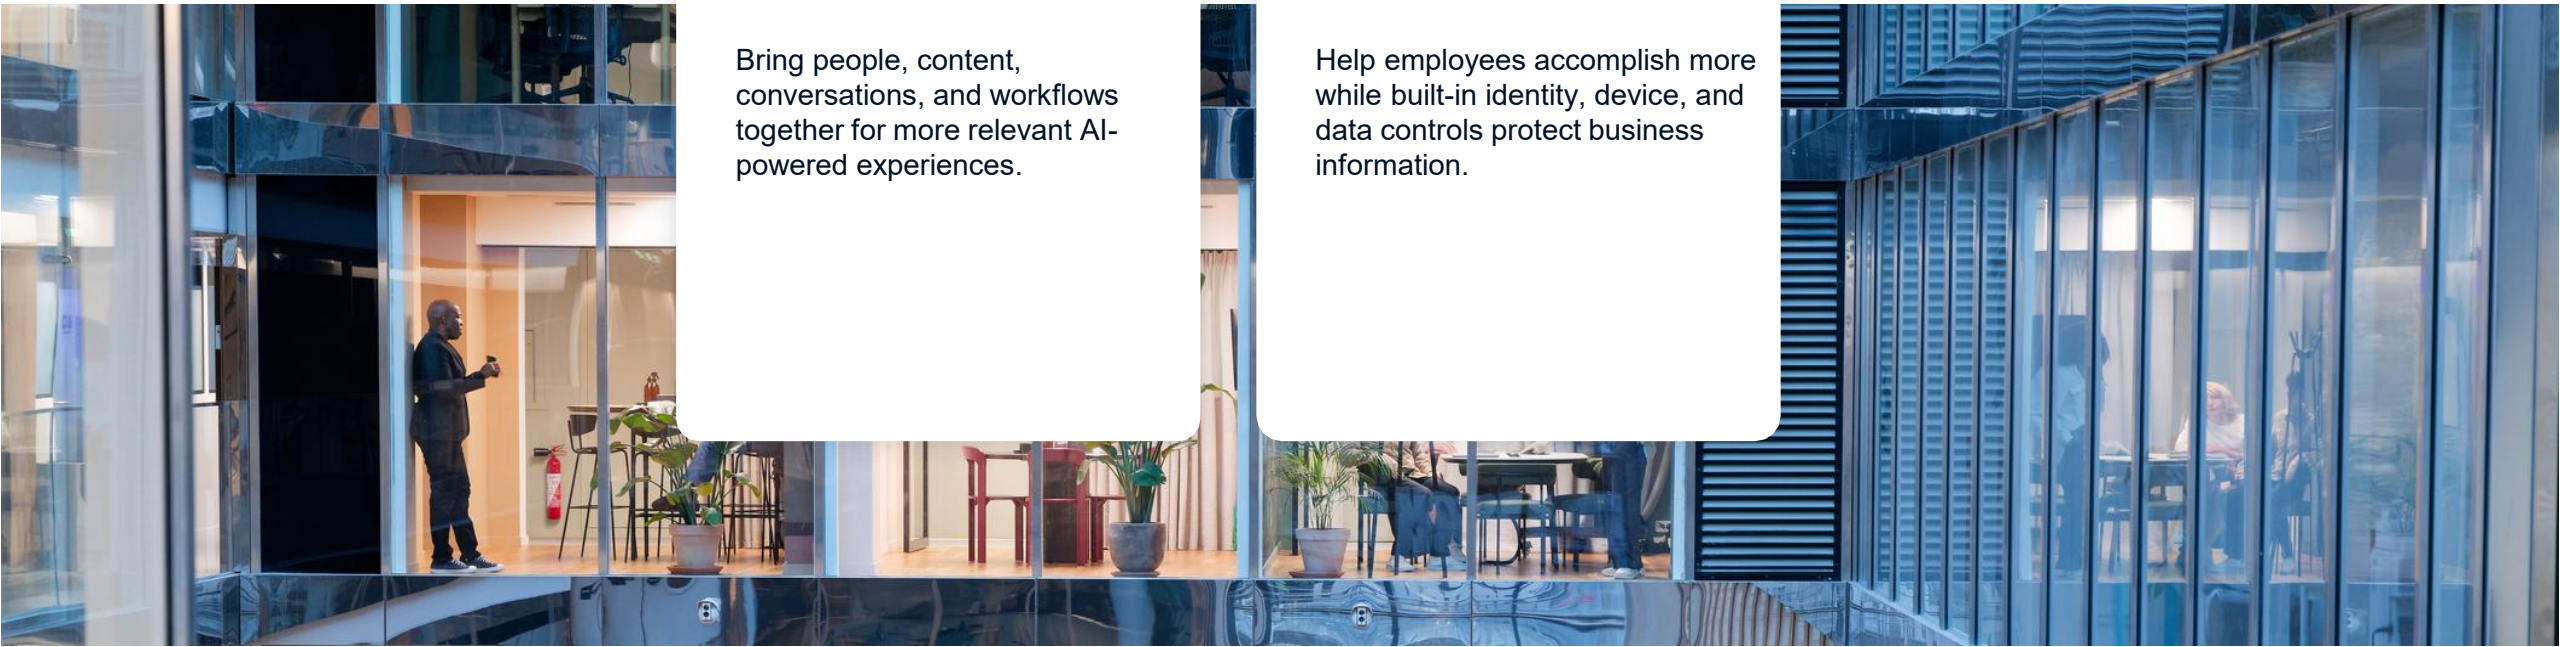

The Norsk can help you establish this AI-ready productivity foundation with Microsoft 365 Business Premium so your employees can:

1. Connect work and information

Bring people, content, conversations, and workflows together for more relevant AI-powered experiences.

2. Work smarter with protected data

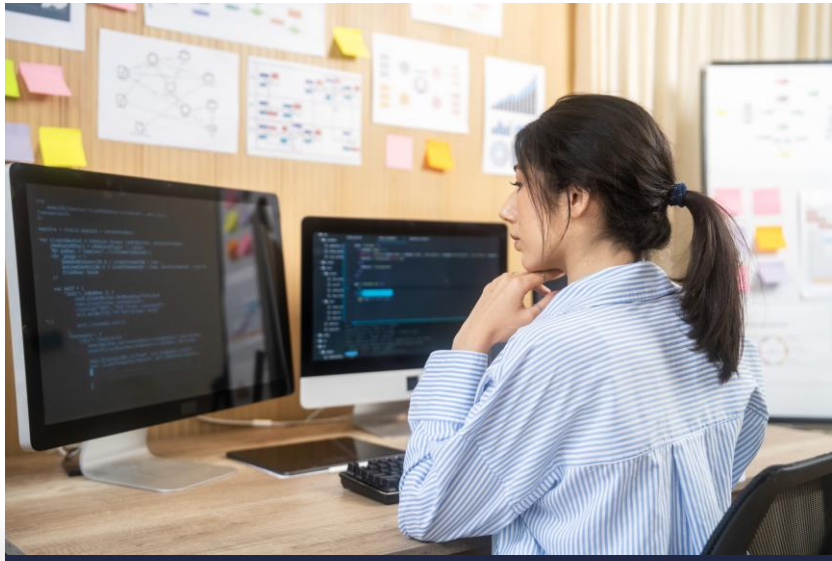

Help employees accomplish more while built-in identity, device, and data controls protect business information.

Security built for the AI era

Instead of stitching together multiple tools, Microsoft 365 Business Premium simplifies IT and establishes a secure foundation for growth by protecting identities, devices, apps, and data through one integrated platform. With security built into the tools employees use every day, your organization can strengthen protection, simplify management, and adopt AI with confidence by:

- **Preparing for secure AI.** Build an AI-ready environment with the security controls, data protection, and device management needed to adopt and scale AI confidently.
- **Reducing complexity.** Replace disconnected point solutions with one platform that combines security, identity, compliance, device management, and productivity to strengthen protection.
- **Lowering costs.** Reduce duplicate technology spending while simplifying security administration and ongoing management through platform consolidation.
- **Strengthening security.** Establish foundational protection across identities, devices, apps, and data through one integrated platform.

The power of one integrated platform for secure growth

Companies that use Microsoft Security solutions saw:

- Up to **a 30% decrease** in the likelihood of a breach.[2]
- Up to a **30% improvement** in security response times with auto remediation and fewer false positives.[2]
- Reduced annual technology spending of up to **23%.**[2]
- Business users saved an average of **50 minutes per week** due to less downtime.[2]

Extend your protection with advanced security built for your business

Once you have established foundational security with Microsoft 365 Business Premium, you can extend your protection with Defender Suite, Purview Suite, or the combined Defender and Purview Suite for Business Premium to help prevent advanced cyberattacks, protect data, support compliance, and adopt AI confidently.

Defender Suite for Microsoft 365 Business Premium

As cyberattacks become more sophisticated, your business needs protection that spans identities, endpoints, email, and cloud applications. Defender Suite for Microsoft 365 Business Premium helps detect, investigate, and respond to threats using AI-powered security capabilities and integrated threat intelligence.

- Help stop phishing, malware, ransomware, and credential attacks
- Automate threat investigation and response
- Reduce operational complexity through a unified security experience
- Strengthen protection across users, devices, and applications

Purview Suite for Microsoft 365 Business Premium

AI adoption creates new opportunities, but also introduces new data risks. Purview Suite for Microsoft 365 Business Premium helps you understand where sensitive information exists, govern AI usage, prevent unwanted data exposure, and support compliance requirements.

- Discover and manage AI usage across the organization
- Reduce sensitive data exposure
- Protect business-critical information
- Support governance, compliance, and regulatory readiness
- Enable responsible AI adoption

Build the right foundation for secure growth in the AI era

AI is creating new opportunities to improve productivity, accelerate growth, and compete more effectively. Growing businesses need security that evolves alongside innovation to realize those benefits.

The Norsk has the experience to help you lay that foundation for secure, AI-powered work with Microsoft 365 Business Premium. As your needs change, we can help you extend that foundation in the areas that matter most with Defender Suite for Business Premium to defend against advanced cyberattacks and Purview Suite for Business Premium to help enable AI-powered growth without adding more complexity.
